

Geneva, 4 November 2025

TO WHOM IT MAY CONCERN

The International Trade Centre (ITC), based in Geneva, Switzerland, is the joint agency of the United Nations and the World Trade Organization (WTO). Since 2019, ITC has been implementing the United Kingdom Trade Partnerships Programme (UKTP), funded by the UK Foreign, Commonwealth and Development Office (FCDO). The programme aims to support developing countries to take advantage of the preferential access to the UK and EU markets as granted under Economic Partnership Agreements (EPAs).

In South Africa, the UKTP Tech project supports green technology-focused beneficiary companies through direct capacity building and national and international market access initiatives, with the objective of creating decent work opportunities, decarbonising export supply chains, and tackling climate change.

This letter serves to confirm that Soldevco (Pty) Ltd, a South African cleantech company specialising in sustainable water and agricultural technologies, has been an active participant in the United Kingdom Trade Partnerships (UKTP) Programme in South Africa.

Within this framework, Soldevco (Pty) Ltd is recognised as an emerging leader in South African cleantech. Thus far, they have benefited from several UKTP-supported initiatives, including:

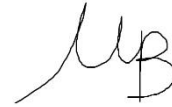

- Participation as an exhibitor at IFAT Africa 2025, showcasing innovative Ultra-Oxygen™ water treatment solutions.
- Representation as an exhibitor and delegate at the ITC Global SME Ministerial Conference 2025, highlighting locally developed green technologies.
- Selection for the upcoming UKTP South Africa GreenTech B2B Mission to London (January 2026), designed to facilitate trade and partnership opportunities between South African and UK cleantech enterprises.
- Inclusion in the UKTP South Africa GreenTech Company Directory (2025), which profiles pioneering South African green-technology start-ups advancing sustainability and circular-economy innovation.

Soldevco's Ultra-Oxygen™ Micro & Ultrafine Bubble Generator technology contributes directly to the objectives of the UKTP Programme by promoting sustainable water use, energy efficiency, and climate resilience. The company demonstrates strong alignment with ITC's mission to foster inclusive and sustainable trade through innovation-driven small and medium enterprises (SMEs). The International Trade Centre commends Soldevco (Pty) Ltd for its commitment to advancing clean technologies and inclusive industrialisation, and recognises its positive contribution toward the achievement of the UN Sustainable Development Goals (SDGs 6, 9, and 13).

Should you require any further information, please do not hesitate to contact me at mvanbruggen@intracen.org.

Yours sincerely,
